

# Hybrid Checking Account – Innovation

## Terms & Charges Disclosure

METHOD USED TO CALCULATE INTEREST	COMPOUNDING PERIOD	INTEREST RATE/ANNUAL PERCENTAGE YIELD (APY)	INTEREST RATE/ANNUAL EARNINGS CREDIT RATE	INTEREST IS CREDITED
Daily Ledger balance	Monthly			Monthly

**EARNINGS CREDIT AND FEES (ECR)** – The Bank calculates a monthly credit by applying a market based rate to the average positive available balance, less a reserve factor (if applicable). The result of this calculation represents the deposit earnings credit amount that is used to offset the service fees for the services the Customer used when such settlement offsetting election is in effect as described below. When in effect and when the fees exceed the Customer’s deposit earnings credit, the Bank will charge the difference to the Hybrid Checking Account. When the deposit earnings credit exceeds fees, the difference will be credited as interest to the Hybrid Checking Account.

The Bank will apply ECR rate up to an agreed threshold balance. Balances above the threshold will earn credit interest. If the settlement offsetting election is not in effect, the earnings credit is settled by crediting as interest.

**ACCOUNT THRESHOLD BALANCE** – The established threshold balance for the Customer will be \$1,800,000. \*

**EARNINGS CREDIT SETTLEMENT OFFSETTING ELECTION**– By opening this hybrid account the Customer also elects for monthly earnings credits to be used to offset the service fees for the services the Customer has used unless and until the Customer notifies the Bank in writing that it is revoking this election to offset interest against fees. The Bank will apply the revocation upon notice.

### ANALYSIS OF ACCOUNT RELATIONSHIP -

If the Customer has more than one Hybrid Checking Account, the Bank will group all such accounts together to determine the deposit earnings credit and service fees. A single control account will be used to manage the relationship.

### NEGATIVE BALANCE PENALTY -

On days when the available balance is negative, a negative balance penalty will be applied to the account.

**INTEREST CREDIT** – The interest paid is credited monthly. The Bank calculates a monthly interest credit by applying a market rate based on the average balance in the account above the balance receiving earnings credits.

**BALANCE COMPUTATION** – The “Daily Ledger Balance” method applies a daily periodic rate to the principal in the account each day.

**INTEREST RATE CHANGES** – Interest rate and APY may change. The Bank may change the interest rate, solely at its discretion, at any time.

**ANNUAL PERCENTAGE YIELD** – The Annual Percentage Yield (APY) is based on principal and interest left on deposit using a 365-day year with interest compounded daily at the same interest rate. Withdrawal of interest from the Hybrid Checking Account will result in a lower Annual Percentage Yield than stated.

**ACCRUED INTEREST** – For cash deposits, interest begins to accrue on the Business Day the Bank receives the cash deposit. For noncash items (e.g. checks), interest begins to accrue on the Business Day the Bank receives credit for the noncash items. If the account is closed before interest is credited, the Bank will pay the accrued interest.

**STATEMENTS ARE MAILED OR MADE AVAILABLE PERIODICALLY** – Statements for Hybrid Checking Account are made available monthly.

**ACCOUNT CLOSURE** – The day the Hybrid Checking Account is closed; the Bank will pay the accrued month to date interest to the account. ECR accrued up to the account closure will be used to offset service fees. Any amount remaining, surplus ECR, will not be paid.

**RECORDCHECK** – If the Customer chooses this service, the Bank will keep a record of the cancelled checks instead of providing image copies of the front of cancelled checks with the statement. If the Customer needs a copy of a cancelled check, the Bank will

mail it to the Customer. A reconstruction fee may apply if a total reconstruction (copies of all checks and/or statements) is requested for one or more statements.
